

PME9.0 Web 报错-Http error 500.19

问题描述:

HTTP Error 500.19 – Internal Server Error, Error Code 0x800700b7

Cannot add duplicate collection entry of type 'add' with unique key attribute
'value' set to 'Default.aspx'

Detailed Error Information:

Module	DefaultDocumentModule	Requested URL	https://bems/Web
Notification	ExecuteRequestHandler	Physical Path	C:\Program Files (x86)\Schneider Electric\Power Monitoring Expert\Applications\ApplicationFramework
Handler	StaticFile	Logon Method	Anonymous
Error Code	0x800700b7	Logon User	Anonymous

Config Error: Cannot add duplicate collection entry of type 'add' with unique key attribute 'value' set to 'Default.aspx'

Config File: C:\Program Files (x86)\Schneider Electric\Power Monitoring Expert\Applications\ApplicationFramework\web.config

Config Source:

```

75:     <files>
76:         <add value="Default.aspx" />
77:     </files>

```

More Information:
This error occurs when there is a problem reading the configuration file for the Web server or Web application. In some cases, the event logs may contain more information about what caused this error.

解决方案:

步骤如下：

注意：修改以下文件时请先备份。

1. 检查 applicationHost.config 和 web.config 找到重复的 entry 并删除、保存。

applicationHost.config 路径: %windir%\System32\inetsrv\config\

web.config: [...]\\Program Files (x86)\\Schneider Electric\\Power Monitoring Expert\\applications\\ApplicationFramework\\

对比正常的系统与用户出现 Http error 500.19 的系统的 web.config，删除用户文件中 74~78 行的内容后保存。

```

66  <system.webServer>
67      <validation validateIntegratedModeConfiguration="false" />
68      <handlers accessPolicy="Read, Script" />
69      <httpProtocol>
70          <customHeaders>
71              <remove name="X-Powered-By" />
72          </customHeaders>
73      </httpProtocol>
74      <defaultDocument>
75          <files>
76              <add value="Default.aspx" />
77          </files>
78      </defaultDocument>
79      <staticContent>
80          <clientCache cacheControlMode="UseExpires" httpExpires="Sun, 05 Jan 2020 17:43" />
81      </staticContent>
82  </system.webServer>
83  <system.serviceModel>
84      <serviceHostingEnvironment aspNetCompatibilityEnabled="true" multipleSiteBinding

```

My vm PME9.0, web application is normal

customer's PME9.0, web application "HTTP Error 500.19"

2. 重启 IIS 后 Web Application 可正常打开。
